**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to an array of biological reagents, classified in class 422, subclass 50.
- II. Claims 8-10, drawn to a method of making an array, classified in class 435, subclass 4.
- III. Claims 11-15, drawn to a method of making an array, classified in class 435, subclass 7.1.
- IV. Claims 16-19, drawn to a method of making an array, classified in class 435, subclass 7.92.
- V. Claims 20-24, drawn to a method of making an array, classified in class 436, subclass 518.
- VI. Claim 25-29, drawn to a kit, classified in class 436, subclass 514.

Inventions (I and VI) and (II-V) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by any of the methods in groups II-V.

Art Unit: 1641

Inventions II-V are unrelated and patentably distinct and separate inventions.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the inventions are not disclosed as capable of use together and they have different modes of operation since the steps in each inventions are different.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for the others, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
